Experience

May 2023 – Present (2 years 4 month)
Security Pitch Company Limited, Bangkok, TH
UX/UI

- Designed and customized UX/UI for cybersecurity platforms, aligning with business and security requirements.
- Built responsive interfaces and collaborated with backend team to integrate data effectively.
- Reviewed frontend beta releases and provided structured feedback to developers, helping improve usability and fix workflow issues.
- Validated UI flows with prototypes and gathered internal feedback to refine user experience before release.

January 2023 - April 2023
Security Pitch Company Limited, Bangkok, TH
UX/UI Intern

- Designed and drafted user interfaces based on English version requirements provided by Business Analysts (BA).
- Adjusted UX/UI flows according to updated requirements from the BA to improve usability.
- Created wireframes and UI designs based on software requirements from BA/SA.
- Documented detailed UI flows to support backend API design and ensure smooth collaboration with developers.
